WHO WE ARE

Speediance is a collective of visionaries dedicated to exploring what's possible in fitness, technology, and well-being, supporting individuals in reaching their full potential.

Milestone

2020

Founded by a core team of 4 members.

2021-2022

Completed angel-round financing.

Released Gym Monster.

Completed Pre-A1 and A2 rounds of financing.

2023

Released Gym Pal.

Released Gym Master Pro series.

2024

Completed A round of financing.

Released Gym Monster 2 and VeloNix.

“At Speediance, we believe in the power of innovation to change lives. Fitness, like technology, is an area where possibilities are limitless—if we dare to think the bigger picture. We’re not here to follow trends; we are here to create them. We’re also not here to be a gym equipment company; we are here to support people to live their best life. Every great breakthrough starts with a single idea, and we’re just getting started. Thank you for being a part of this journey. Moving forward, we will redefine what’s possible.”

— Tao Liu, Founder & CEO of Speediance

Testimonials

"The Speediance Gym Monster is a multifunctional smart home gym that incorporates modern technology — like AI-powered cardio — with traditional resistance-based strength training. Offering up to 220 pounds of adaptive resistance, this easy-to-setup gym doesn't require professional help — it's ready to use out of the box. You get over 630 moves, 230+ classes, and free membership through the Speediance app with it. The smart digital weight system utilizes a 21.5-inch touchscreen that also provides access to digital classes, visual training programs, gym settings and adjustments, and more. It's also a space-saving design, meaning you get a full-size gym that takes up a fraction of the space of a traditional free-weight system."

"The advent of smart home gym equipment has revolutionized the way we approach fitness. With these high-tech machines, such as the Speediance all-in-one home gym machine, working out has never been more convenient or efficient."

"The integrated AI in the Speediance Smart Home Gym is a significant advantage. It dynamically adjusts weights and repetitions based on the user's performance, ensuring efficient and effective workouts. This feature is particularly beneficial for users looking to optimize their training and achieve progressive overload."

"If you've been looking to get your hands on a smart home gym, then now is the time to try out Speediance. Speediance is an all-in-one smart home gym system that allows you to do strength training and cardio on one machine. It uses digital weights and comes with several attachments so you can get a full body workout at home."

"Out of the box, I think it was a race to see if my husband or I would get to use it first. He immediately picked out one of the pre-programmed workouts and dove in. Which actually worked out great for me, so we could figure out a number of things together. Speediance uses a dual motor drive system, which does make it possible to better even out the weight between sides and make those small adjustments. What's really nice about the adjustments is that the machine is also going to track all your workouts and movements per body part, which better allows you to track progress."

"It's no wonder that this versatile piece of equipment is becoming a staple in home gyms across the world."

"The Speediance SmartHome Gym aligns perfectly with these trends, offering comprehensive features that cater to various fitness goals without requiring hours at the gym."

"The Speediance Gym Monster Smart Home Gym is an innovative and compact solution for those seeking a versatile, tech-driven home workout experience. Its space-saving design, coupled with a wide range of exercise options, makes it an attractive option for fitness enthusiasts of all levels."

"CES 2025 has shown me the future of AI in fitness, and it's hilariously unimaginative. The beautiful amp fitness machine and the Gym Monster 2 are home gym setups that use AI to monitor your training and recommend workouts via the kit."

"The Speediance Smart Home Gym earned top marks among Well+Good editors, and won over the hearts of our readers. The fitness system uses electromagnetic weights, cables, and pulleys, and features a screen that streams strength training and cardio workouts into your home. You can also use it as a ski or rowing machine. 'For such a compact smart home gym, the performance of Speediance is impressive,' says Well+Good contributor and certified personal trainer Amber Sayer. 'You can use the touchscreen to digitally adjust the electromagnetic resistance up to 220 pounds, which is more than enough for me, and should be plenty for most recreational athletes and home gym users.'"

"It's no secret that AI technology has offered great advancements in many industries — the fitness industry is no exception. The new Speediance Gym Monster uses electromagnetic force through two cable pulleys to create resistance up to 220 lbs. Without requiring a real weight stack in your home, this unique technology helps stimulate real resistance in your muscles that can equate to muscle gain."

"This fitness system is just one of the several offered by Speediance and is billed as a "the mighty home gym."

TECHNOLOGY AND INNOVATION

Revolutionize Fitness with Innovations Unveiled

By combining groundbreaking engineering, eco-friendly materials, and user-centric design, Speediance redefines what fitness industry can achieve.

Digital Weight System

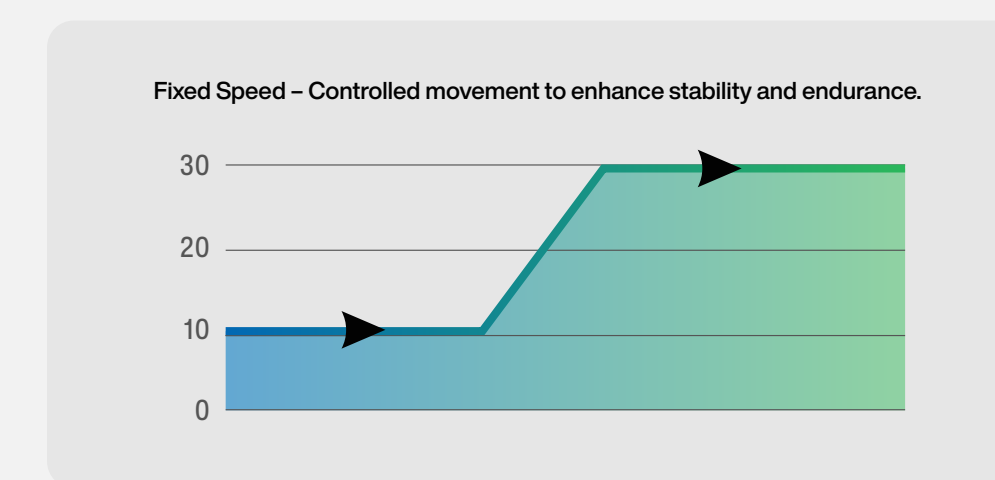

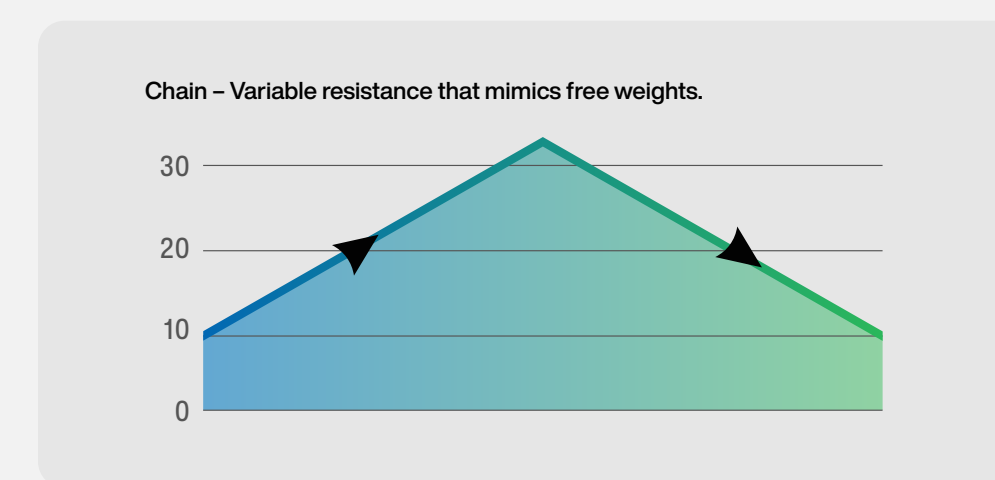

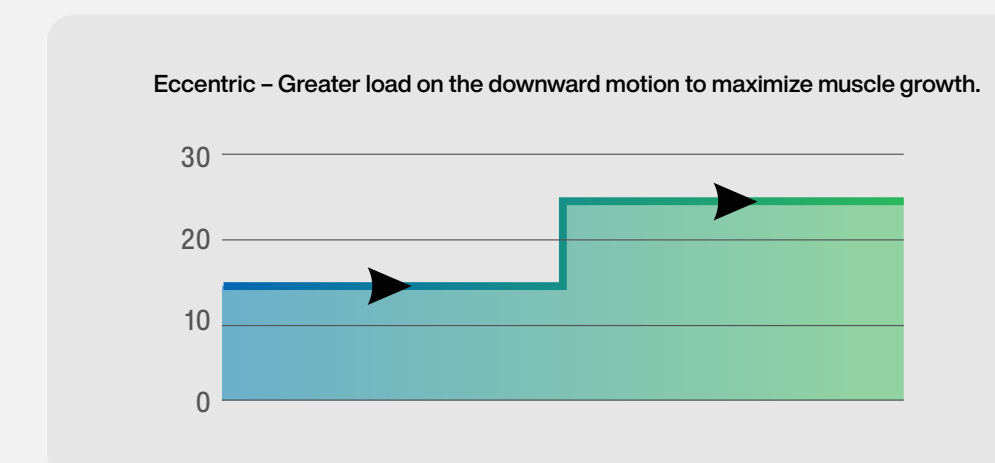

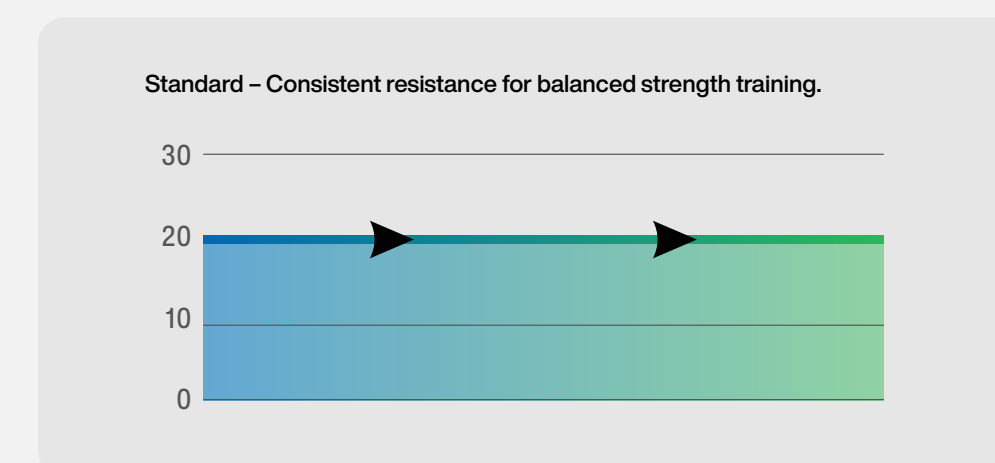

With a core patent for dual-motor direct drive technology, it combines advanced algorithms and motor synergy to set a new standard in the fitness industry.

Next-Gen Power, Smarter Workout

Unlike traditional fitness systems that struggle with efficiency and precision, Speediance leverages **high-voltage direct drive technology**. This advanced system delivers **ultra-precise digital resistance**, ensuring every movement **smoother, more controlled, and more responsive**. Just like lifting real weights, the users get the most **efficient, natural, and effective training** experience every time.

Unmatched Precision, Next-Level Performance

With independent torque output from both motors, the system delivers a maximum pulling force of **100 kg (220 lbs)** with precise adjustments down to **0.5 kg (1lb)**. Advanced control algorithms and a 10 kHz control frequency ensure **rapid response** and **real-time data feedback**. The system supports **four training modes** tailored to your fitness needs.

VeloNix Powertrain System

With powerful performance, smart algorithms, and superior design, the VeloNix offers an efficient, safe, and real-life like cycling experience, making it the ultimate choice for modern smart home fitness.

Pro-Level Performance

Speediance VeloNix features a **world-class powertrain system**. It delivers **2300W peak power**, matching the sprinting force of professional cyclists. With **180Nm of precise torque** and **less than 1% resistance error**, it ensures a **smooth, stable ride**, even under high-intensity training. The system also supports up to a **30° gradient** and seamlessly simulates **Shimano and SRAM gear systems**, bringing you the most **realistic outdoor cycling experience** indoors.

Upmost Safety & Durability

In terms of safety and durability, the VeloNix features a **fully enclosed design**, making it **pet-friendly** and **minimizing safety risks**. It also includes a **built-in one-way bearing** for **instant braking**, preventing foot slippage and ensuring a smooth ride. The transmission belt is rigorously tested for **20,000 kilometers**, guaranteeing long-lasting durability.

Design to Outperform

Structural Stability

Speediance Gym Monster series features an innovative L-shaped structure that enables multi-angle strength training. Its carbon steel construction ensures stability for effective workouts.

All-in-One Engineering

At Speediance, one machine unlocks a lifetime of training. Its all-in-one system simplifies your workout, eliminating the need for multiple devices.

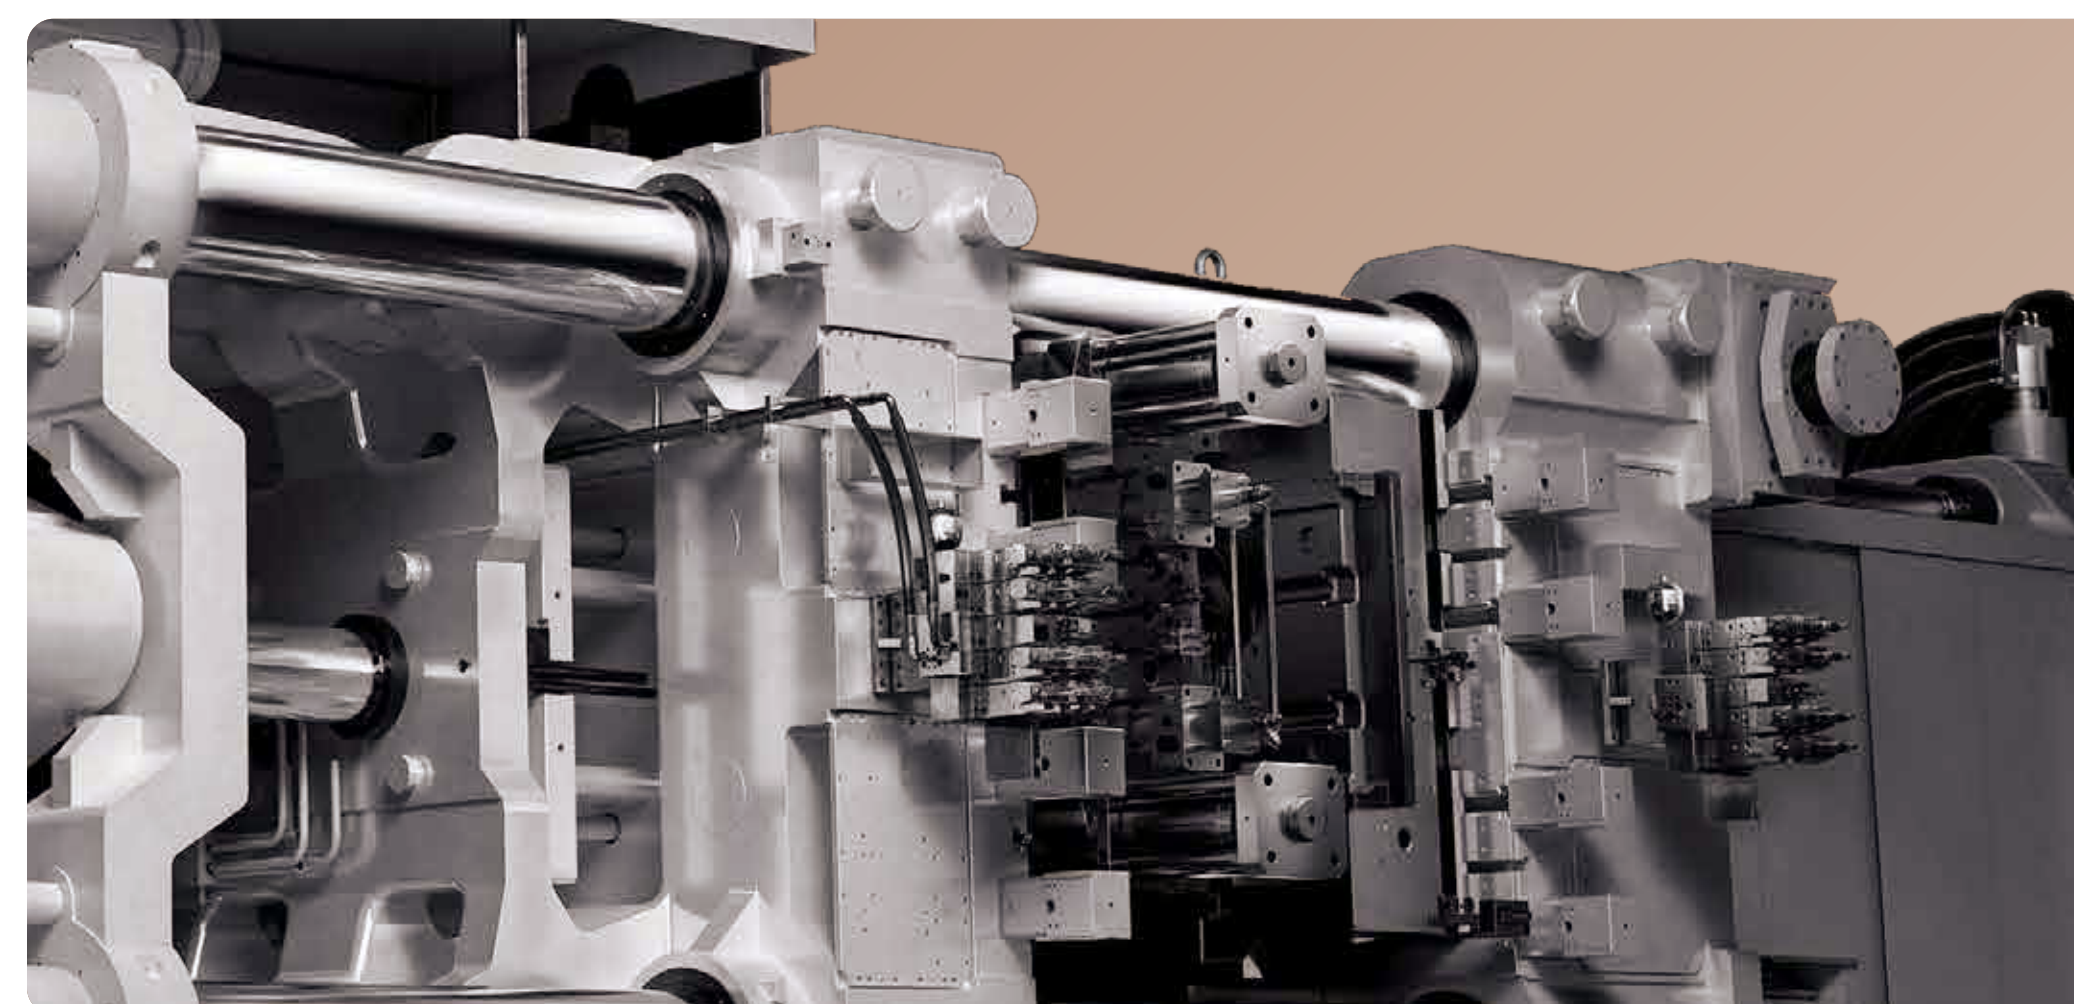

Ergonomics for All

Five grip positions, adjustable seat tilt, and fore-aft settings ensure a customizable fit for everyone.

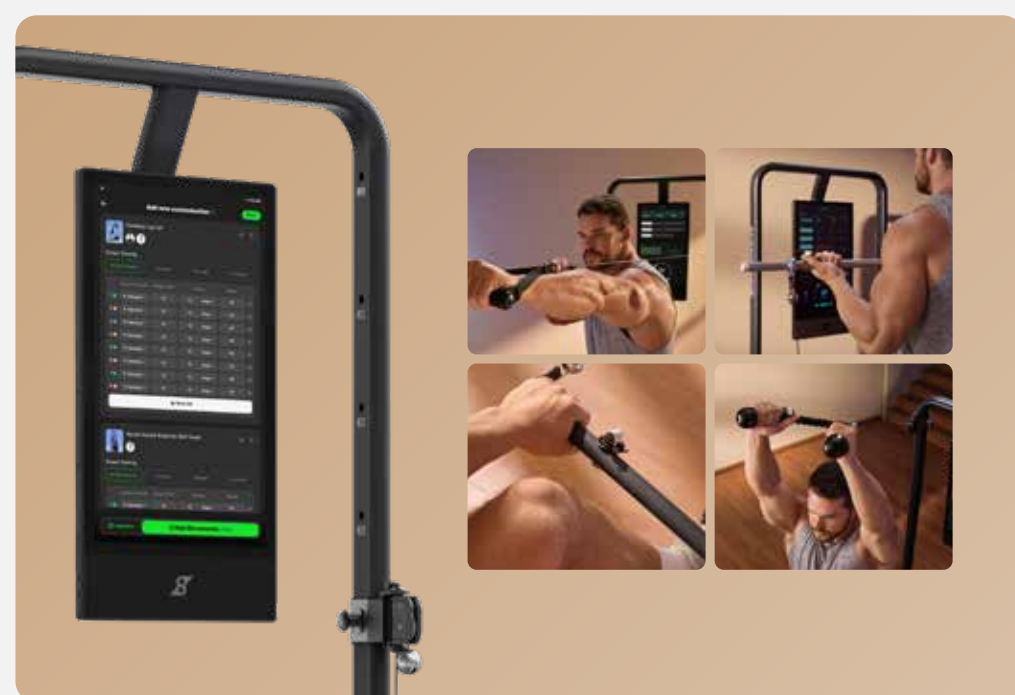

Robust Durability

Speediance VeloNix sets a new industry standard, using 2500 tons of automotive-grade die-casting technology for the first time in a bike, ensuring exceptional strength, durability, and lightness.

AI Empowers Every Move

Smarter Workouts

AI Coach Rec.

From day one, our AI coach learns your preferences and workout habits. It crafts a personalized training schedules and adjusts daily targets based on your current physical status.

Fine Precision

Advanced motion recognition ensures every move is optimized for both safety and effectiveness.

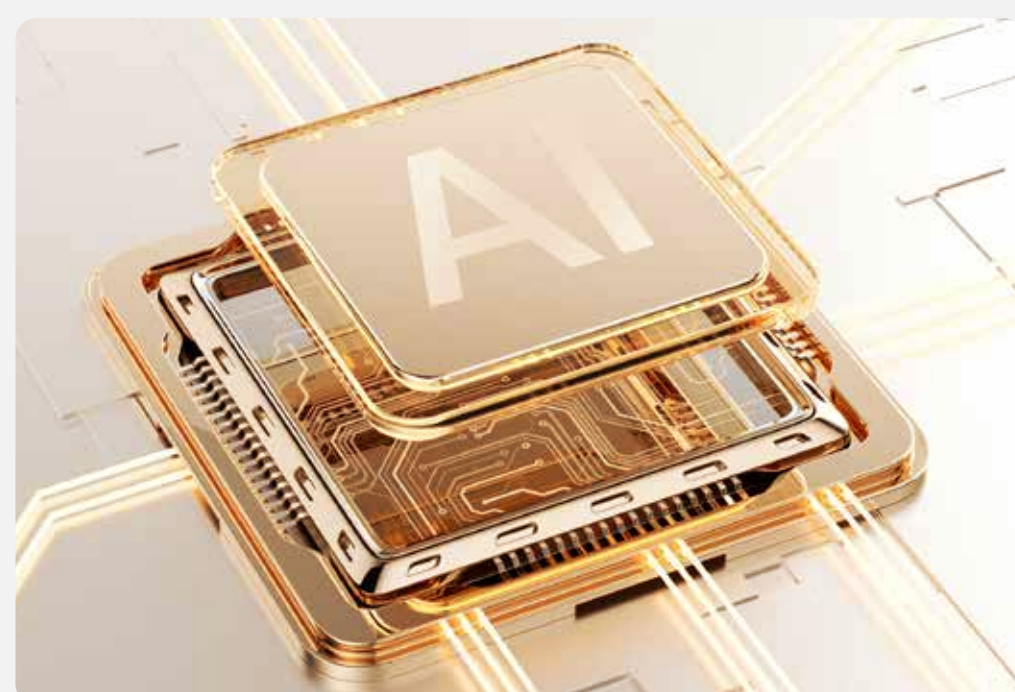

Data-Driven Insights

Actionable Analytics

From heart rate to power output, every metric is intelligently processed to offer meaningful feedback.

Trend Analysis

Go beyond numbers—discover patterns and track progress that fuels your journey forward.

AI for the Future

Evolving Intelligence

Our AI system continuously learns and adapts, ensuring it gets smarter with every session. We aim to become the world's leading model in fitness and health.

Beyond Fitness

Extending beyond workouts, our AI enhances daily health management and personal growth, supporting you every step of the way.

Speediance Standard

We raise the bar high for the industry at every stage.

Research & Development

Each Speediance product has a R&D cycle of at least 12 months.

Every product must differentiate itself from 81 alternatives before finally reaching the customer.

Quality Control

Every component of a Speediance product undergoes testing three times beyond industry standards.

We demand a 100% quality yield rate.

Software Update

Speediance releases at least one software update every three weeks.

Each update is rigorously tested by over 1,000 canary testers to ensure a seamless and improved user experience with every rollout.

We have independently developed cutting-edge core technologies and hold over 50 patents, including design and utility model patents, demonstrating our dedication to innovation and excellence.

EMPOWERING

Your Best Self is Yet to Come

Jesse Colbert

"I got my Gym Monster in late June of this year...and the difference in me from the Olympic Challenge to the Turkey Pump (November) is striking. I love this machine and the encouragement from this community that keeps me lifting. I still can't believe my results. Can't wait for the next challenge...my bi's and tri's might be ripping my shirt. Thank you all. Your encouragement and your stories make you apart of my results."

Tanvir Hossain

"60 days, and the results are in!
I've been using Speediance 5 days a week, combined with strict calorie control. The first pic shows me at 79kg, and the second at 69kg. Body fat went from around 23% to 20% (give or take, the machine wasn't the most precise so don't quote me on this). Huge shoutout to Speediance—I've tried starting this journey countless times but always struggled to stay consistent due to my hectic work schedule. Speediance made it possible to finally commit, and now I truly believe in transforming my physique."

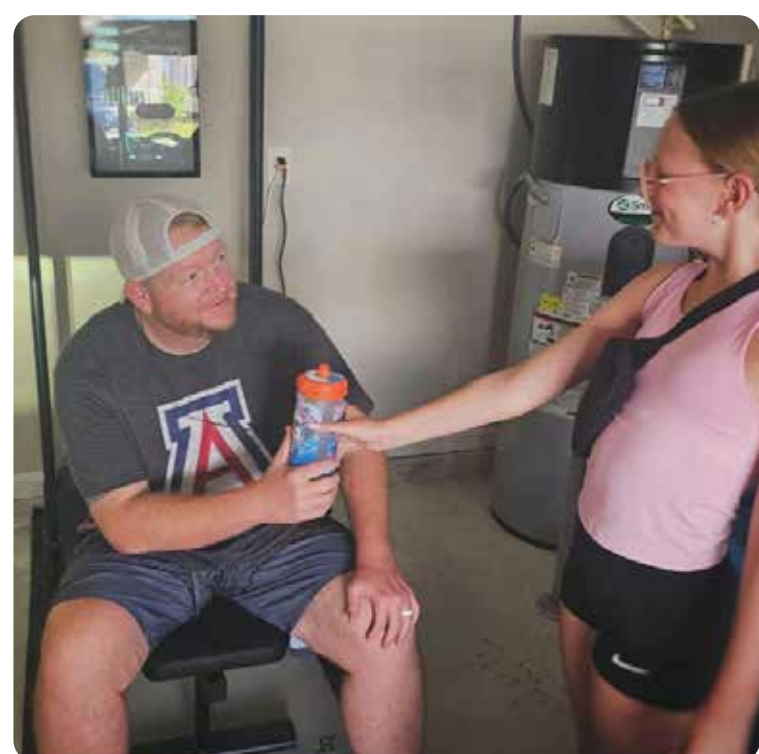

Nau Har

"165 lbs in June 2024 to 156 lbs in September and still going. Not flexing in the pictures."

Cassie Eggers Holcomb

"Six months of consistency and hard work! I still am nowhere near my goals, but this progress makes me want to push harder!"

Matt Rhodes

"It's been a little over a year since I started on a personal journey to make my myself, my health, and wellbeing a priority again. I wouldn't be here without the love and support of my amazing family. Losing over 100 lbs is just the beginning. @speediance.official has been an integral part of this transformation. There simply isn't anything else that checked all the boxes for me and what I needed in a compact, moveable, and affordable home gym solution. I love the free membership too!"

Carl Charroux

"I signed up for a bodybuilding show on January 1st... when I told a friend and he saw my Gym Monster he told me I'd never get in good enough shape using only it... Well, at 61 years old, using ONLY my Gym Monster - I won both my classes at the LA Grand Prix - open bodybuilding and classic physique masters 60+ classes!!! This tool is amazing and the flexibility and efficiency of using was a major factor in grabbing the gold!!! Keep up the great work and look forward to updates in the future."

In Their Words

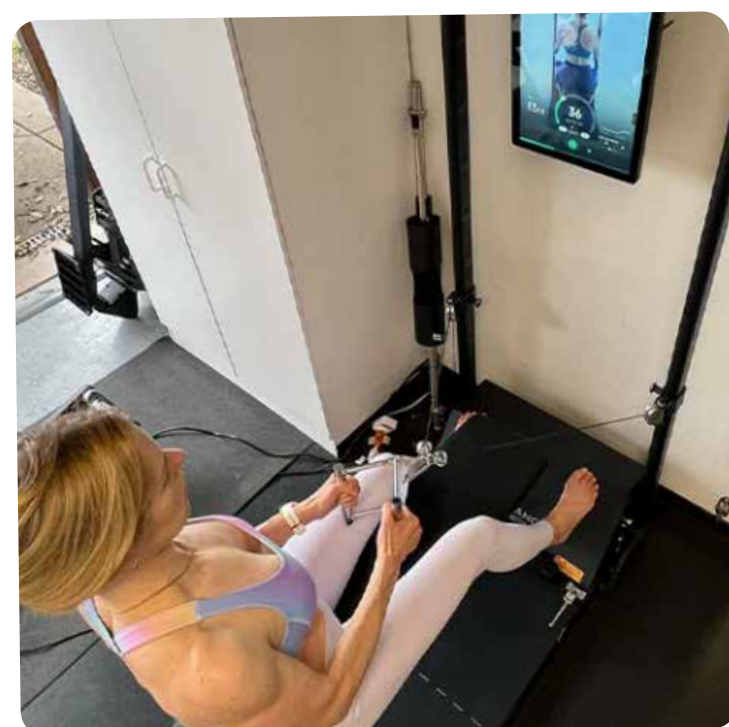

Tommy Schumpert

“Father/son workout! Our kids see us! Keep setting that bar of hard work, discipline, and leading them to be fit! This machine is absolutely amazing. Easy transition of different workouts, no racking or reracking weights, and my son is more interested in working out with

Brittany Breaux

“I LOVE the Speediance. It really built out our home gym. I’m an early riser / working mom and love the flexibility of working out at home before the kids get up.”

Sam Sam Alkagolik

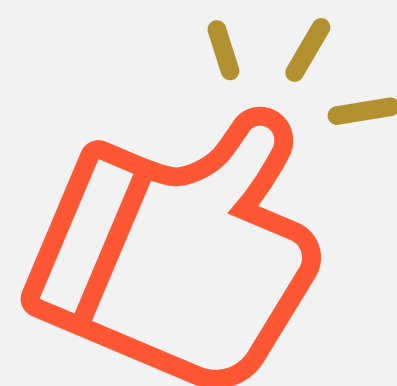

“With Gym MMonster, now I am able to workout at home at any time I want and actually able to do workouts that I want and also create programs for general Speediance

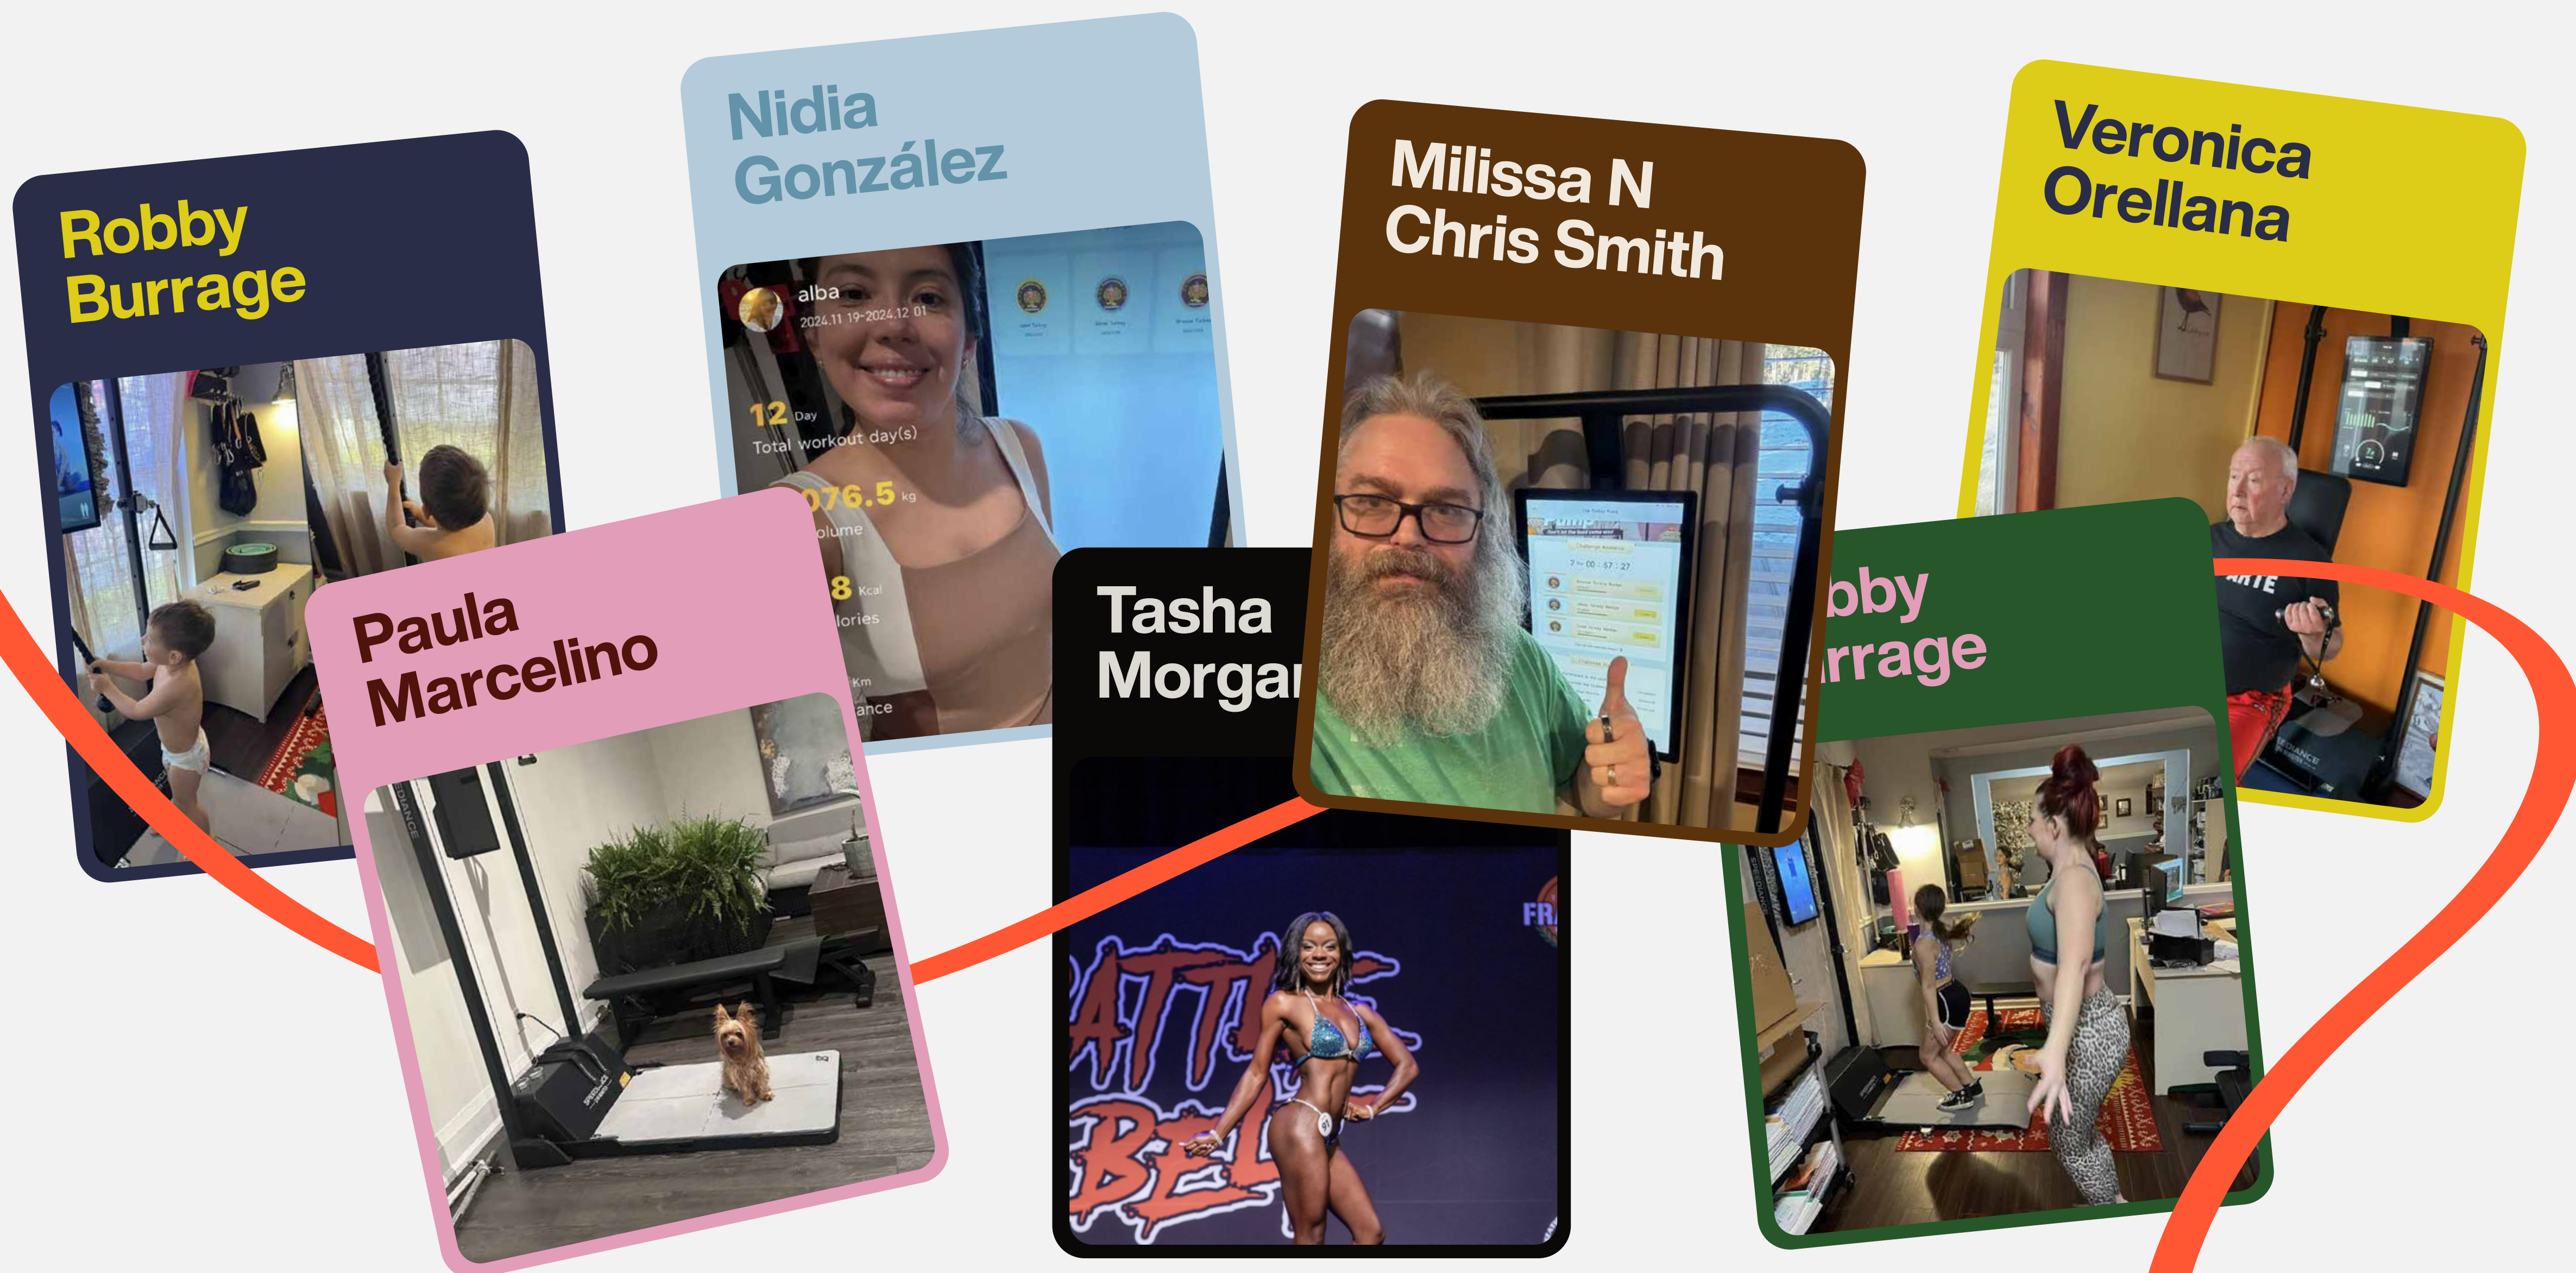

Sonya Yaksich

“I worked crazy rotating shifts as a nurse so going to the gym was not an option. I bought the gym monster as an early retirement gift to myself and its been hands down the best purchase ever. Since my retirement, I use it daily and now at age 65 I'm in the best shape of my life.”

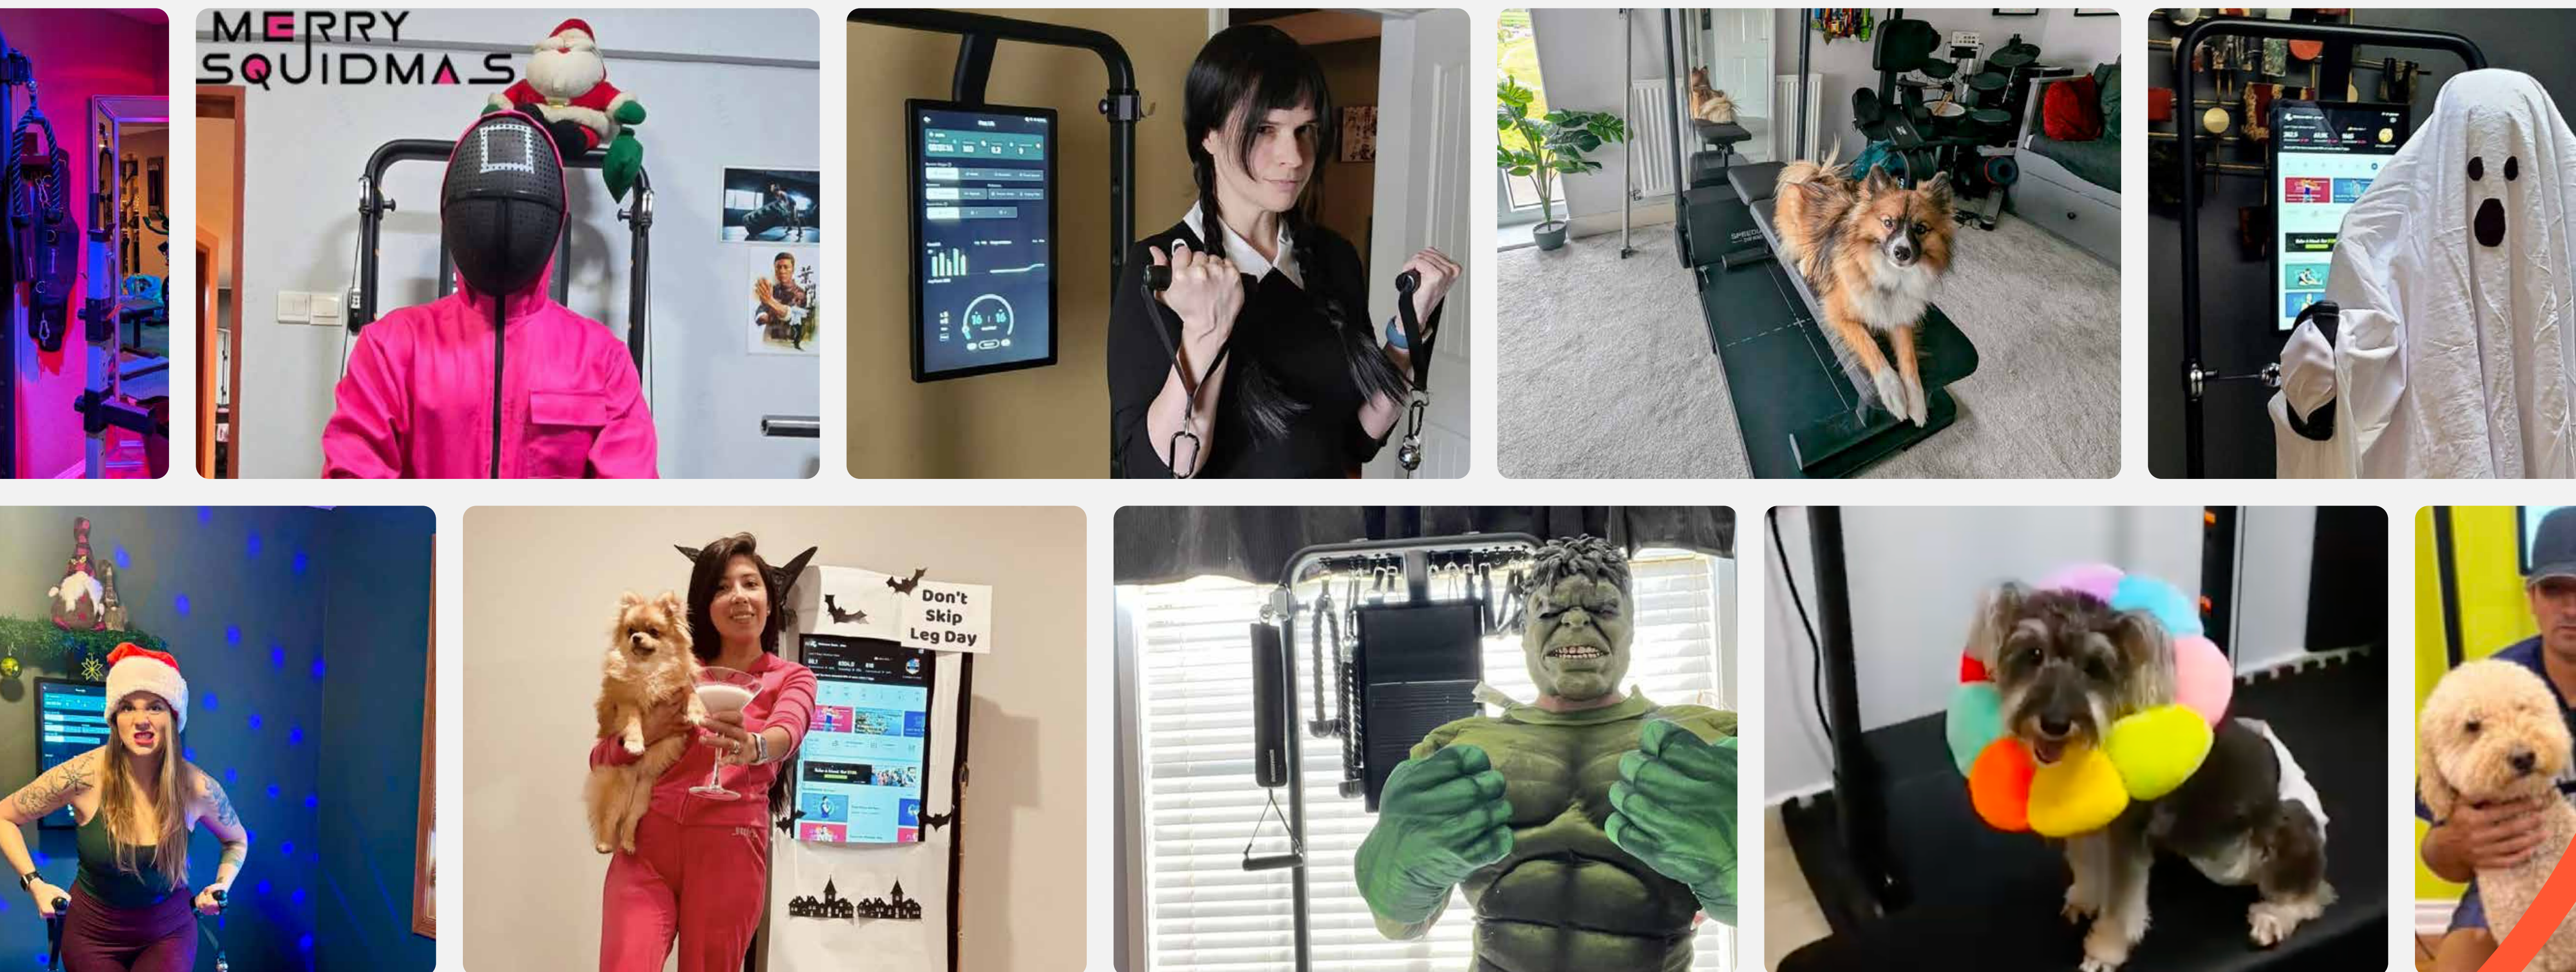

See You a Year from Now.
